

6 0 0 0 3 Airborne RGB to SDI Converter *STANAG 3350B RGB - SDI*

Features

- DO160 certified
- Converts Stanag 3350B to SMPTE-259M-B digital video
- No user controls
- Compact
- Low power consumption

The Airborne STANAG 3350B RGB Converter is a lightweight and compact video converter for use in airborne or other military applications.

The unit converts Stanag 3350B PAL analogue RGB video to SMPTE-259M-B definition digital video.

It is used to convert analogue video from an airborne camera source such as a surveillance turret into a digitised format for distribution, display and/or storage.

It is designed to be Plug-and-Play without any external configuration options.

Signal Input	RGB sync on green
Signal Output	SDI
Input Connector	MS38999 (power & signal)
Output Connector	BNC
Power	16-40vdc, 2.8w
Size	120mm x 140mm x 47mm inc. base plate
Environment	RTCO 160G -45°C-+70°C operationalCo-160G
Vibration, Altitude, Acceleration	RTCO-160G contact factory for full details
